# ABOUT US

## WHO WE ARE ?

- Established in 2003, Centra is an independent, privately owned company, specialized in manufacturing and supplying disposable medical wearing apparel. Our production facility is equipped with technology for production of medical and hygienic products from non-woven textiles and updated on regular basis to meet the ever-changing requirements of the healthcare industry. The ability to customize our range of disposable kits as per customer's requirements has given us an edge over our competitors in the respective main .

## OUR STRENGTH ?

- We have been able to design and develop highly functional products by keeping the aspects of our customers, physicians or healthcare professionals together. The materials used are made from high quality medical grade material - light non-absorbent, non permeable, breathable, and biodegradable - which is extremely low linting thus eliminating the risk of airborne infections. The quality control unit is headed by qualified staff to ensure the highest level quality control

## INFECTION CONTROL

- It is a documented fact that micro-organisms found on human skin are the primary cause of wound infection in surgery. This is why effective sterile draping and sterile gowns for hospital staff is an extremely important aspect of infection control. Textile products become penetrable to bacteria after some usage and do not provide proper protection. Scientific studies has proven that expenditures on infection prevention has always been less costly than treatment. Infection increases the patients length of recovery Time in the hospital, the amount of antibiotics used, supplies and time of hospital staff. These increased costs alone are well above the investment for superior draping and sterile techniques. The above mentioned facts have been the reference point for Centra to develop the sterile drapes and gowns to prevent wound infection.

**Centra received the following certificates:**

## Surgical Gowns

# • Surgical Gowns

## Comfort and Protection

- Surgical Gowns provides you a unique balance of comfort, value and protection. We have considered the variety of procedures you work on everyday and ever-changing conditions associated with them.

**Standard Gown**

Standard gown made of fluid-repellent nonwoven fabric with a micro-fiber middle layer. High resistance to fluids and Bacteria penetration, Abrasion-Resistant and low-linting.

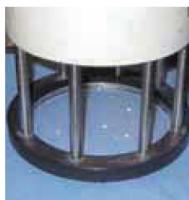

**Reinforced Gown**

Reinforced gown giving you maximum protection with Anti-static and Fluid Resistance.

## What will you be wearing ?

It's important to choose the right gown for the right procedure. Clinicians and surgeons should begin the surgical gown selection process by considering the following test.

**Strike-through resistance test** (in cm)

↑ Higher is better

Reinforced Gown

Standard Gown

**Puncture resistance test** (in psi)

↑ Higher is better

Reinforced Gown

Standard Gown

**Strength test** (machine direction in lbs.)

## Sterilization Products

# • Sterilization Products

## Sterilization Products

- Centra offers you Sterilization Products in a wide range of sizes and shapes in both self-sealing and heat-sealing styles with chemical process indicators imprinted on the product that change color when sterilization cycle is complete, without the risk of ink contamination.

-Centra Sterilization products are made to be used in hospitals and other healthcare centers, for in-house sterilization of surgical instruments. Our products include: Heat-Sealing or Self-Sealing Pouches, Sterilization Tapes, SMS and Crepe Paper Wraps in different grammages.

-Centra Pouches, Reels and CSR wraps provide outstanding resistance to microbial penetration, helping to maintain sterility of the contents in the product until opened. It is compatible with all the most commonly used sterilization methods, including Ethylene Oxide (ETO).

-The great advantage of using Sterilization Products is the superior high quality and tear strength of the film.

We have developed a film that will be more resistant and not easy to break or tear than many others in the market.
